## COMPANY OVERVIEW

Established in 2004, Newbridge Wireless is a leading innovator and practitioner in the area of in-building wireless communications and indoor emergency responder radio solutions for a multitude of diverse venues. We collaborate closely with customers, Original Equipment Manufacturers (OEMs), and all major wireless service providers (WSPs) to develop, design, and deploy advanced cellular distributed antenna systems (DAS).

As a premier provider of reliable and robust DAS solutions, Newbridge Wireless has delivered hundreds of millions of dollars of DAS wireless infrastructure from coast to coast. From commercial real-estate, government and manufacturing, to healthcare, hospitality and higher-education, we incorporate the latest technology development in all of our practices to deliver cost-effective, future-proof solutions to our valued customers.

Newbridge Wireless also specializes in indoor emergency responder radio coverage (ERRC) solutions. Licensed by FCC to design and test ERRC systems, Newbridge works closely with building owners and authorities having jurisdiction (AHJs) across the country to ensure their facilities are up to current safety and fire codes.

We offer a comprehensive range of services including the finance, design, implementation, operation and maintenance of cellular wireless neutral host, outdoor and indoor Distributed Antenna Systems (DAS), Public Safety Radio, and Small Cell networks.

[Contact Newbridge Wireless](#) for a complimentary site review and needs assessment to help you determine the best commercial DAS solution for your buildings and campus!

## COMPANY PROFILE

- **Year Established: 2004**
- **Principal Offices: Fulton, MD & Los Angeles, CA**
